Terrace Refurbishment, Stoney Cross, Lyndhurst

Full Wecryl Roof Waterproofing System

Westwood Liquid Technologies Wecryl Roof Waterproofing System was successfully installed on the 30m2 terrace with a new OSB timber deck to a residential property in Stoney Cross, Lyndhurst. The old felt roof was

removed and a waterproof robust trafficable system was required for this terrace area. Westwood Approved Contractor Protec Roofing Ltd, cleaned and prepared the existing substrate, then directly applied Wecryl 276 Primer, followed

by a coat of Wecryl 230 and Wecryl 230 thix for the detailing. After the Hard Wearing Layer, Wecryl 233 was installed, the project was nicely coated with a light grey Wecryl 288 Finish. To further add to the aesthetics a lovely Tile Effect with

Board joints and upstand details completed with Wecryl 230thix Waterproofing Layer + reinforced Fleece. Ready to start on field area.

Grout lines being taped out on Waterproofing and Hard Wearing Layer. Ready for a tile effect Finish with black/white Deco Chips.

Wecryl 230 Waterproofing Layer being installed with reinforced Fleece.
