Completion: January 2017

Old House, Ardingly Road, West Hoathly, RH19 4RA

Wecryl Waterproofing System on a New Build

This project was challenging due to the massive moisture content within the screed and the tile effect finish around the roof lights.

Due to the complex finish, the project required the highest level of workmanship, particularly communication and fine attention to detail was key, as the most important aspect was to ensure that the outdoor tile effect would create a seamless effect with the indoor slabs.
