

# StrataPlan Lightning Conductor Clip

Specialist lightning conductor clip for use with StrataPlan PVC membranes

## Product overview

StrataPlan Lightning Conductor Clips have been designed for securing lightning conductor tape to the StrataPlan membrane system. The clips are manufactured from high quality polymer with excellent UV repellent properties, keeping them from fading and going brittle in the sun's rays. If a lightning strike happens, the clips release the lightning strip, instead of damaging the roof.

## Application guidelines

To install the StrataPlan Lightning clip correctly, follow these steps:

- Use a chalk line to ensure a straight line installation
- Weld the Lightning Conductor Clip to the StrataPlan membrane at 500mm intervals or as instructed by the lightning protection system installer
- Proceed to install the lightning conductor tape
- Close the clip securely and snap the light into place.

Please note that only Strata approved contractors are authorised to install StrataPlan Lightning Conductor Clips.

## Technical characteristics

Properties	Declared Performance
Attachment	Hot air welded to StrataPlan membrane
Colour	Anthracite
Thickness	1.5mm
Size	70mm diameter
Material	PVC-P

## Compatibility

This product should only be used with the StrataPlan range of PVC single ply membranes.

## Environmental considerations

StrataPlan Lightning Conductor Clips can be disposed of in accordance with local regulations. The clean waste material can be recycled. Any contaminated waste must be disposed of in accordance with local regulations.

## Health and safety

The product does not contain any substance which is likely to be detrimental to your health or to the environment and complies with generally admitted Health and Safety Requirements.

Health and Safety should be observed at all times in accordance with HSE and industry guidance. Specific Risk Assessments and Method Statements should be produced by contractors where necessary to ensure Working at Heights, Fire Safety and Manual Handling rules are compliant with current law and regulations. A material safety datasheet is available for this product upon request.

## Further information

The information contained in this datasheet, along with any advice provided (either written or verbal) through testing are based on our experience and do not constitute any product guarantee for the installer.

We recommend that all of the information provided is carefully studied before proceeding with application, and strongly advise that suitable tests are carried out on site before application in order to determine the suitability and compatibility for the specific project.

The application, use and processing of our products are beyond our control, and therefore under the exclusive responsibility of the installer. As a result, the installer will be solely responsible for any damage derived from the partial or complete disregard of our guidance or the general mis-use of any of our materials.
