

Key:

StrataBit Capsheet

StrataBase Underlay

Construction Notes:

Mechanically fix the GRP trim at 150mm centres or as per the site specific wind-load calculation. Alternatively, create a welted drip as indicated.

The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 8217, BS 6229, and STRATA recommendations.

Alternative Detail (NTS)

Timber batten mechanically fixed to decking
(to create a hard edge)

GRP trim mechanically
fixed

Min.
50mm

Lead cover flashing mechanically
fixed to the timber batten and
fully formed to provide cover to
the tiles/slates

Roof tile
