

Key:

StrataFleece Separation Layer

StrataBit Capsheet

StrataBase Underlay

StrataTherm Insulation

StrataVap Air & Vapour Control Layer

Construction Notes:

Ensure that paving system is capable of resisting wind uplift

The insulation should be compressive-resistant to withstand the anticipated live and dead loads.

The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 8217, BS 6229, and STRATA recommendations.
