

Key:

StrataPlan Detail Membrane

Hot Air Weld

StrataPlan SF Membrane

StrataTherm Insulation

StrataShield Air & Vapour Control Layer

**Construction Notes:**

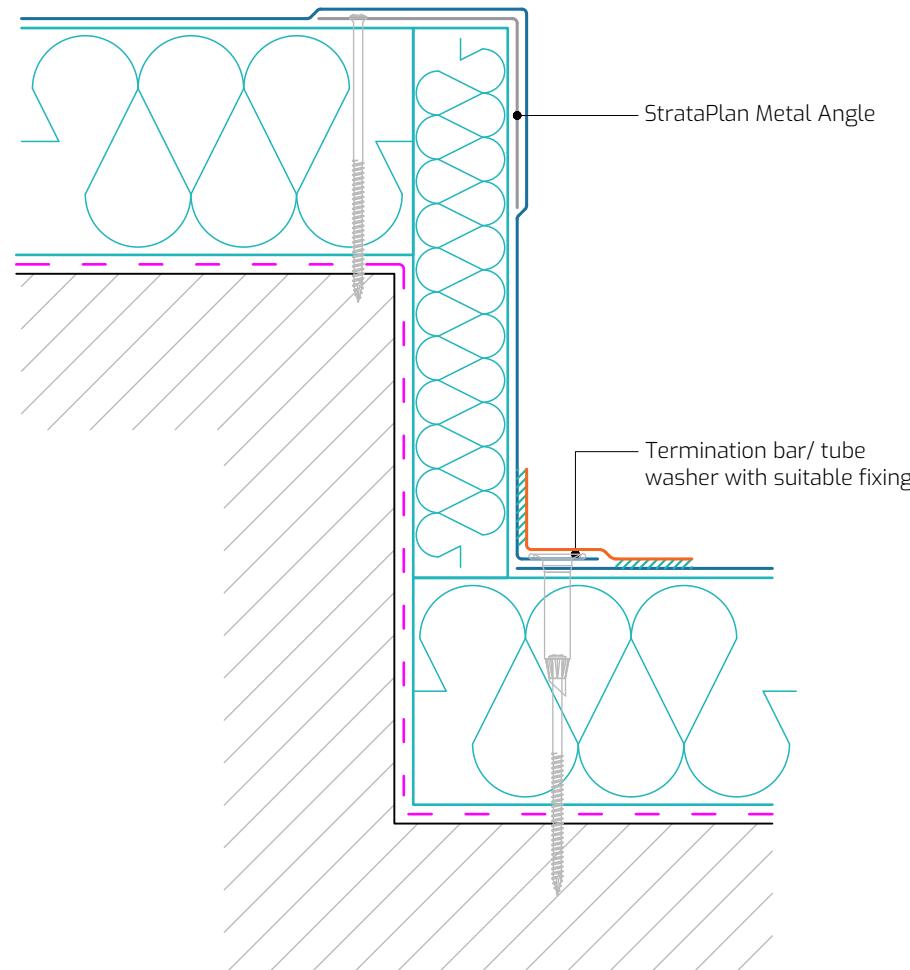

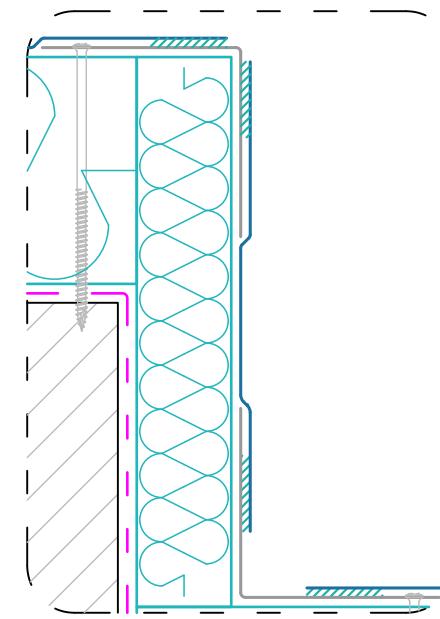

Mechanically fix the StrataPlan Metal Angle and termination bar at 150mm centres, or as per the site specific wind-load location.

Any upstand in excess of 250mm should be mechanically fixed at the leading edge with appropriate fasteners in order to avoid slippage of the waterproofing membrane.

The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 6229, and STRATA recommendations.

Alternative Detail

REINFORCED PVC-P WATERPROOFING MEMBRANE
