

Key:

StrataPlan Detail Membrane	
Hot Air Weld	
StrataPlan SF Membrane	
StrataTherm Insulation	
StrataShield Air & Vapour Control Layer	

Construction Notes:

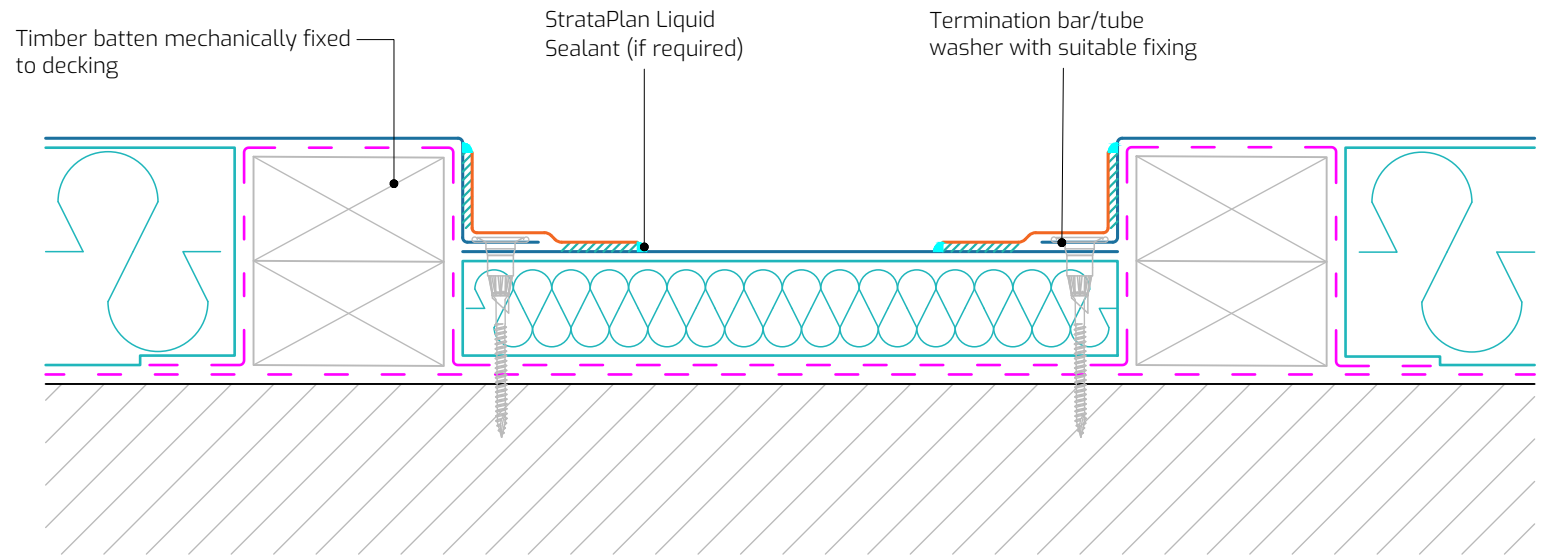

Apply treated timber battens to the decking to form the gutter. Alternatively, a StrataPlan Metal Gutter can be utilised as indicated.

Mechanically fix the termination bar or StrataPlan Metal Gutter at 150mm centres or as per the site specific wind-load calculation.

The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 6229, and STRATA recommendations.

Alternative Detail (NT5)
