

Key:

StrataPlan Detail Membrane	
Hot Air Weld	
StrataPlan SF Membrane	
StrataTherm Insulation	
StrataShield Air & Vapour Control Layer	

Construction Notes:

Use a strip of StrataPlan SF Membrane to form the upstand. Alternatively, a StrataPlan Metal Angle can be utilised as indicated. Ensure all waterproofing terminate a min. 150mm above the finished roof level.

Mechanically fix the termination bar/pressure plates or StrataPlan Metal Angle 150mm centres or as per the site specific wind-load calculation.

Apply the specified roof light in accordance with manufacturers recommendations. The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 6229, and STRATA recommendations.

Timber batten and plywood to create the kerb

Min.
150mm

Alternative Detail (NTS)

StrataPlan Metal Angle
