

Key:

StrataPlan SF Membrane

Hot Air Weld

StrataTherm Insulation

StrataShield Air & Vapour Control Layer

**Construction Notes:**

Apply treated timber battens to the perimeter to create a hard edge.

Mechanically fix the pre-formed metal trim at 200mm centres or as per the site specific wind-load calculation.

The system build-up and application should adhere to the STRATA issued specification.

All surfaces must be clean, dry, and suitably prepared to accept the waterproofing system.

All details should be installed in full compliance with the most up-to-date NHBC Standards, BS 6229, and STRATA recommendations.

StrataPlan Metal Trim

Min.
50mm

Fascia board

Timber batten mechanically
fixed to decking (to create a
hard edge)
